

A superior copper alternative is now available

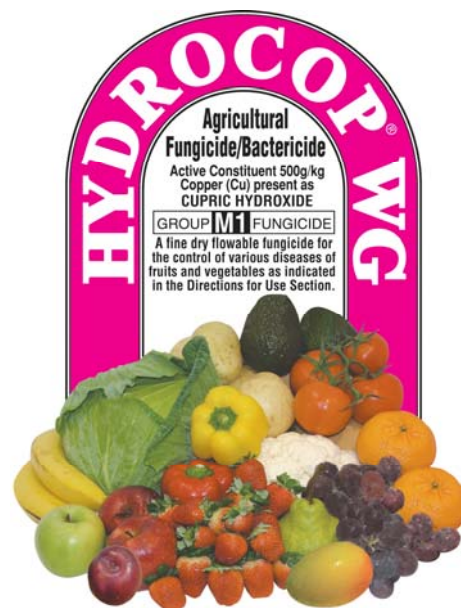

From the manufacturers of Coppox[®] comes a new, cost-effective cupric hydroxide...

FEATURES & BENEFITS:

- **Cost effective and high quality** fungal disease & bacteria control over an extensive range of fruit, vegetable, tree & nut crops.
- **Granule / dry-flowable Formulation** = less dust.
- **Contains no dyes:** which result in a clean, un-coloured crop.
- **Reduced rates:** optimizing disease control with reduced rates of copper in the soil.
- **Less Handling:** The concentrated formulation (at 500g active) makes life easier for growers. There is less handling per vat / hectare sprayed.
- **Small Particle Size:** leading to better coverage on the plant surface & no nozzle blockages*. Small particle size also results in excellent suspension characteristics.
- **Minimal Heavy Metal Impurities:** well below the standards set by the World Health Organisation, which is in keeping with our company philosophy of supplying 'clean' products.
- **OH & S Friendly:** pack sizes are below the recommended 18kg maximum weight. Available pack sizes = 2kg & 10kg

* When used as per the directions for use label.
