- **The ultimate OH & S Formulation**
- Available in 20L, 200L and 800L pack sizes
- Suitable for all horticultural growing districts, and all fruit & vegetable crops (as per the Directions for Use Leaflet)

LABEL EXTRACT:

Tomatoes	Bacterial Spot, Bacterial speck, Bacterial canker	All states	220 to 280 mL/100L or 2.4 to 3.0L/ha	Apply at the first sign of disease and repeat at 7 to 14 days while conditions allow infection. The shortest interval should be used when conditions are very favourable for infection ie. During wet weather and when inoculum levels are high. These applications will reduce the spread of bacterial canker but they will not control seed or soil borne infection.
	Target spot/ Early blight, Septoria leaf spot		280 mL/100L or 3.0L/ha	Apply at first sign of disease and repeat every 7 to 14 days while conditions allow infection. The shortest interval should be used when conditions are highly favourable for infection.
	Irish blight/ Late blight			Apply at the first sign of disease and repeat at 10 to 14 day intervals while conditions allow infection. Minimise use on seedlings to avoid retarding growth
Capsicums	Bacterial spot, Bacterial canker		280 mL/100L or 3.0L/ha	SEED BEDS: Apply every 7 days during wet weather. FIELD CROPS: Apply at the first sign of disease and repeat at 7 to 14 day intervals, while conditions allow infection. Use the shortest interval when conditions are highly favourable to infection These applications will reduce the spread of bacterial canker but they will not control seed or soil borne infection.
Cucurbits	Angular leaf spot, Bacterial leaf spot		280 mL/100L	Apply when the disease first appears and repeat at 10 to 14 day intervals, while conditions allow infection.
